World History Teaching in Asia Shingo Minamizuka 2019-03-30 World History Teaching in Asia is the first broad survey of the content and approaches used to teach world history in secondary schools and colleges in Asia. The collection has been crafted by scholars and educators whose goal was to shed light on the importance of history education and to foster understanding of and between Asian countries. These essays show how the teaching of world history in Asian countries has developed since World War II, with many interesting parallels, including the issue of Eurocentrism, but also distinctive national trends, and considerable changes over time. At a time when many Asian countries are making great strides in education, this study of history education in Asia will be of real interest to educators, history scholars, and policy-makers worldwide.

Paper and Thin Layer Chromatography Ivor Smith 2013-10-22 Chromatographic & Electrophoretic Techniques, Fourth Edition, Volume 1: Paper and Thin Layer Chromatography presents the methods of paper and thin layer chromatography. This book discusses the practical approach in the application of paper and thin layer chromatography techniques in the biological sciences. Organized into 18 chapters, this edition begins with an overview of the clinical aspects related to the detection of those metabolic diseases that can result in serious illness presenting in infancy and early childhood. This text then discusses the three major types of screening for inherited metabolic disorders in which paper or thin-layer chromatography are being used, including screening the healthy newborn population, screening the sick hospitalized child, and screening mentally retarded patients. Other chapters consider the procedures for thin layer chromatography. This book discusses as well the complexity of amino acid mixtures present in natural products. The final chapter deals with the detection of synthetic basic drugs. This book is a valuable resource for chemists and toxicologists.

The Mechanics of Modernity in Europe and East Asia Erik Ringmar 2004-08-02 Why, from the eighteenth century onwards, did some countries embark on a path of sustained economic growth, while others stagnated? This text looks at the kind of institutions that are required in order for change to take place, and Ringmar concludes that for sustained development to be possible, change must be institutionalized. Taking a global view, Ringmar investigates the implications of his conclusion on issues facing the developing world today.

Functional Neurologic Disorders 2016-10-06 Functional Neurologic Disorders, the latest volume in the Handbook of Clinical Neurology series, summarizes state-of-the-art research findings and clinical practice on this class of disorders at the interface between neurology and psychiatry. This 51-chapter volume offers an historical introduction, chapters on epidemiology and pathophysiology, a large section on the clinical features of different type of functional neurologic symptoms and disorders (including functional movement disorders, non-epileptic seizures, dizziness, vision, hearing, speech and cognitive symptoms), and then concluding with approaches to therapy. This group of internationally acclaimed experts in neurology, psychiatry, and neuroscience represent a broad spectrum of areas of expertise, chosen for their ability to write clearly and concisely with an eye toward a clinical audience. This HCN volume sets a new landmark standard for a comprehensive, multi-authored work dealing with functional neurologic disorders (also described as psychogenic, dissociative or conversion disorders). Offers a comprehensive interdisciplinary approach for the care of patients with functional disorders seen in neurologic practice, leading to more efficient prevention, management, and treatment Provides a synthesis of research efforts incorporating clinical, brain imaging and neurophysiological studies Fills an existing gap between traditional neurology and traditional psychiatry Contents include coverage of history, epidemiology, clinical presentations, and therapy Edited work with chapters authored by leaders in the field, the broadest, most expert coverage available

A SAGA OF SMITHS: AN EPIC FAMILY HISTORY Richard Smith 2018-09-25 This Family History traces the varied fortunes of the Smiths of West Yorkshire. It also examines their connection with other families, including: - The Absaloms of Hampshire and London - The Cardens of Brighton - The Cloughs of Sutton and Crosshills - The Fareys of Skipton - The Fosters of Waterford, Ireland and Birmingham - The Gillinsons of Leeds - The Hastings of Holderness - The Morton's of America - The Myersons of London - The Stamfords of East Yorkshire - The Wilsons of Calderdale A key theme running throughout this History has been the determined use of what could aptly be termed 'survival strategies' by successive generations of Smiths. Their aim was always to bolster a precarious 'respectability' in what was often a harsh and unstable environment. The mass of factual and bibliographical information found within its pages will prove useful to Research Students and Family, Local and Social Historians. Above all, it offers a legacy to inspire both present and future family members

Handbook of Epistemic Cognition Jeffrey A. Greene 2016-01-22 The Handbook of Epistemic Cognition brings together leading work from across disciplines, to provide a comprehensive overview of an increasingly important topic: how people acquire, understand, justify, change, and use knowledge in formal and informal contexts. Research into inquiry, understanding, and discovery within academic disciplines has progressed from general models of conceptual change to a focus upon the learning trajectories that lead to expert-like conceptualizations, skills, and performance. Outside of academic domains, issues of who and what to believe, and how to integrate multiple sources of information into coherent and useful knowledge, have arisen as primary challenges of the 21st century. In six sections, scholars write within and across fields to focus and advance the role of epistemic cognition in education. With special attention to how researchers across disciplines can communicate and collaborate more effectively, this book will be an invaluable resource for anyone interested in the future of knowledge and knowing. Dr. Jeffrey A. Greene is an associate professor of Learning Sciences and Psychological Studies in the School of Education at the University of North Carolina at Chapel Hill. Dr. William A. Sandoval is a professor in the division of Urban Schooling at the UCLA Graduate School of Education & Information Studies. Dr. Ivar Bråten is a professor of Educational Psychology at the Faculty of Educational Sciences at the University of Oslo, Norway.
