*Marking Matric* Vijay Reddy 2006 The past ten years in South Africa has seen many changes in education - the creation of a single department of education; common examinations for all learners in public schools in the country, a new outcomes based education curriculum which was introduced to learners in the general education and training phase since 1998 and will be introduced to the further education and training phase from 2006. To evaluate the success of these changes South African researchers still use the indicator of student achievement. The matriculation examination is the visible, high profile and public performance indicator. Every year parents, learners, teachers, researchers, government officials, policymakers, and the general public get involved in the debate around the matric examination with the most frequently asked questions being - Did the pass rate go up? Are standards dropping? Are the results real or have they been manipulated? How is our education system doing? Are we meeting the development goals? What should the matriculation examination of the future look like? participants from government (national and provincial),

*Things Fall Apart* Chinua Achebe 2013-04-25 Okonkwo is the greatest warrior alive, famous throughout West Africa. But when he accidentally kills a clansman, things begin to fall apart. Then Okonkwo returns from exile to find missionaries and colonial governors have arrived in the village. With his world thrown radically off-balance he can only hurtle towards tragedy. Chinua Achebe's stark novel reshaped both African and world literature. This arresting parable of a proud but powerless man witnessing the ruin of his people begins Achebe's landmark trilogy of works chronicling the fate of one African community, continued in Arrow of God and No Longer at Ease.

Drug Abuse: Prevention and Treatment Mangai Natarajan 2017-05-15 Ever since the Shanghai convention in 1909, the threat posed to human well-being by drug abuse has led countries around the world to take action to deal with their drug problems. There are wide variations in the policies pursued, but most countries try to reduce both the supply of and the demand for drugs. Unfortunately, there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them. Consequently, control and prevention policies are mostly driven by political considerations, economic realities and cultural expectations, though research has played an important part in formulating and evaluating treatments for drug addiction. This volume reviews studies on drug abuse prevention and treatment strategies under five main areas: 1. Reducing supply - strategies to control the flow of drugs from production to retail distribution; 2. Reducing demand - prevention of drug use at all stages of involvement and consumption levels; 3. Reducing harm - promoting situational risk reduction practices for regular users, addicts and recreational users; 4. Reducing addiction - drug treatment options for various groups in various settings; and 5. Drug policies and prescriptions - focused on debates about prohibition and legalization.
